EDUCATION

The University of Chicago | Master of Science Applied Data Science | Expected December 2025 | GPA:4.0

Coursework: ML, Big Data, Time Series Forecasting, Data Science for Algorithmic Marketing, Bayesian Machine Learning, GenAI

PES University | Bachelor of Technology in Computer Science Engineering | May 2024 | GPA:3.92

Coursework: Data Analytics, Machine Intelligence, Network Analysis and Mining, Database Management Systems, Data Structures

SKILLS

Languages:	Python (NumPy, Pandas, TensorFlow, Keras, PySpark, NLTK) R, SQL, C, C++
Data Visualization:	Power BI, Tableau, Looker, DAX, Matplotlib, Plotly, Seaborn, EXCEL
Machine learning:	RAG, AgenticAI, GANs, Bayesian ML, GenerativeAI, ARIMA, LSTM, Computer Vision
Algorithmic Marketing:	Conjoint Analysis, Promotional & Pricing Analysis, Competitive Analytics, Market Segmentation
Big Data and Cloud:	Spark, Hadoop, Hive, Kafka, Docker, K8's, Google Cloud Platforms, Amazon Web Services
Core Competencies:	Strategic thinking, Adaptability, Empathy, Time management, Teamwork, Resilience, Creativity

EXPERIENCE

1. Evoke Technologies | *Dayton, OH*

Jun 2025 – Ongoing

Data Science Intern, Capital Markets (AI & Financial Research)

- Build a fully automated pipeline analyzing 9,000+ U.S. stocks and ETFs daily, saving 4–5 hours of manual effort and improving operational efficiency
- Use machine learning and NLP to uncover patterns in market activity, investor sentiment, and company performance
- Led exploratory data efforts on high-frequency market data to identify profitable trading strategies
- Develop predictive models to analyze option flow and detect directional trading signals, contributing to portfolio optimization, risk-adjusted returns, and data-driven strategy design

2. University of Chicago, Argonne National Laboratory | *Chicago, IL*

Apr 2025 – Dec 2025

Research Collaborator , Connected and Automated Vehicle

- Leading a collaborative research initiative with Argonne's CAV group to design a camera-based distance estimation system with $\leq 10\%$ error tolerance
- Aligning technical outputs with client priorities around road safety, energy efficiency, and PII compliance for future deployment in sensor-limited environments
- Evaluating model performance across 15+ urban and highway scenarios to ensure consistency under real-world variability

3. GlaxoSmithKline (GSK) | *Bengaluru, India*

Jan 2024 – Jul 2024

Graduate Intern, Detection Engineering and Cyber Analytics

- Automated internal service request triage with a Streamlit-Python tool, saving 8+ hours every day in analyst time
- Visualized anomalous behavior using Power BI dashboards for behavior analytics (UEBA project)
- Authored 20+ detailed response playbooks for threat detection cases on SPLUNK and WIZ platforms.
- Earned a certificate in advanced Splunk workflows to support cyber threat detection and strengthen data science analyst capabilities
- Acted as a bridge between Cyber Analytics and Detection Engineering teams, applying data science to map O365 telemetry to the MITRE ATT&CK framework for early threat detection modeling

RESEARCH & PROJECTS

1. Bayesian Deep Learning for Diabetic Retinopathy Classification | (May'25 – Present)

Summary: Developing a CNN with Bayesian linear layers and Monte Carlo Dropout to classify diabetic retinopathy into 5 stages with uncertainty-aware predictions and referral logic for ambiguous cases. Used: **PyTorch, Bayesian layers (Blitz), GANs, Diffusion Models, Monte Carlo Dropout**

2. OList E-commerce Marketing Analytics | (Mar'25)

Summary: Worked on a project to optimize sales, enhance customer experience, and improve operations through data-driven insights; using **Customer Segmentation, Behavior Prediction, Product Performance Evaluation, Market Basket Analysis, and Sales Forecasting**

3. AI-Driven Tech Stock Dynamics: A Multivariate Time Series Approach | (Mar'25)

Summary: Developed a project to determine whether AI advancements provide meaningful signals for short-term stock price movements; used Time series models like **VAR, VARMAX, ARIMA and LSTM**.
